

Abdullah Khadem Aljamee

Artificial Intelligence Engineering | Data Science

☎ +963938808641 @ abdkg3@gmail.com 🔗 linkedin.com/in/abdullah-khadem-aljamee-08a307224 📍 Damascus, Syria

SUMMARY

AI engineer and data scientist eager to contribute to a cause. I am young, active, I love to constantly develop myself, and my desire to learn never ends.

EDUCATION

Informatics Engineering / Artificial Intelligence Engineering and Data Science

Syrian International Private University for Science & Technology

10/2020 - Present Damascus, Syria GPA 85 / 100

- Artificial Intelligence specializes in foundational courses in mathematics, programming, algorithms, machine learning, deep learning, and fuzzy logic, in addition to knowledge about expert systems, robotic , genetic algorithms, and intelligent search algorithms.
- Data Science specializes in foundational courses in mathematics, statistics, data analysis techniques, database systems, big data, and distributed systems
- Took additional courses in image processing, computer vision, big data, data analysis, software engineering, and networking basics

Bachelor of Science in Management BSCM / Marketing

Syrian Virtual University

10/2020 - Present Damascus, Syria GPA 80 / 100

- Marketing basics, product management, sales management, and service marketing
- In addition to the basics of accounting, economics and human resources

PROJECTS

Optilearn AI - An Intelligent Recommendation System For Knowledge Restoration and University Courses

02/2024 - 05/2024

<https://github.com/abdullah-kj/Smart-Recommendation-System-for-Knowledge-Restoration-and-Educational-Path-Guidance-for-Students>

Worked on study the appropriate methods for implementing the recommendations by studying research papers and then working to find the best method according to the available data that we have. Integrated With Udemy, offering Supportive Course Recommendation on over than 140 thousands of courses.

Worked on Developing a Recommendation System that utilizes NLP techniques such as extracting embeddings from courses details and titles, used Sentence-Transformers library

Stock Market Data Analysis using Big Data Techniques

10/2023 - 02/2024

<https://github.com/abdullah-kj/Stock-Market-Data-Analysis-using-Big-Data-Techniques> work was done in this project to create a real environment on two servers for the Syrian Private University to work on analyzing data in the stock market, where the Hadoop environment and many big data technologies such as Hive and Power BI were installed, and the analysis was also focused on the Nifty 100 index.

Potato Disease Classification Using Deep Learning

02/2023 - 06/2023

<https://github.com/abdullah-kj/Potato-Disease-Classification-Using-Deep-Learning>

The system classifies potato leaf infections into one of three categories: leaf Healthy, a leaf infected with early potato blight, or a leaf infected with potato blight Late potatoes.

SKILLS

Artificial Intelligence Tools

Tensorflow	PyTorch	Pandas	SikitLearn
Keras	Matplot	Google colab	
Anaconda	Jupyter	NLP	nlTK
Open CV			Spacy

Data Science Tools

Big Data	Apache Hadoop	Hive
MapReduce	Apache Superset	Power BI
Oracle	SQL Server	MYSQL
Kaggle	No SQL	MongoDB
Neo 4j	SQL Plus	Cassandra

Programming Languages Tools

Python	PHP	Git Hub	C++
Problem Solving	Java	HTML	CSS
Fast API	VS Code	Matlab	R
Design pattern	Algorithm & Data structure
